Education

BNM Institute of Technology **Bengaluru, India**
B.E in Artificial Intelligence and Machine Learning Engineering - CGPA: 8.88 2022 – 2026

Professional Experience

Trianz June 2026 - present

Designed, built, and deployed four production AI and web platforms on Microsoft Azure for sales, finance, HR, and leadership teams. Built AI agents and automation that discover buying signals from news, score sales leads with Azure OpenAI and Claude, and generate deal recommendations and leadership summaries. Also built an automated fund request portal with Excel sync and email alerts, and a six-tab KPI dashboard with Python data pipelines, using React, Next.js, TypeScript, Node.js, and PostgreSQL.

Projects

Concierto Lead Intelligence (React, TypeScript, Node.js, PostgreSQL, Claude API)

- AI-powered lead qualification platform that scores sales leads on six BANT+HS dimensions using deterministic logic on an 18-point scale. Uses the Claude API to generate analyst notes, recommended offerings, next actions, and outreach emails. Includes bulk CSV and Excel upload for hundreds of leads at once, pipeline summaries across leads, PDF and Excel export, and a shared team history stored in Azure PostgreSQL. Live in production on Azure App Service.

Internal Leadership Dashboard (Next.js, React, TypeScript, Python, pandas, Azure)

- Six-tab KPI dashboard covering Finance, Sales, HR, Delivery, Active Engagements, and Backlog, consolidating metrics for Trianz leadership in one view. Python ETL pipelines read live SharePoint files via Microsoft Graph API and refresh on a weekly schedule or on demand. Includes AI leadership summaries and per-deal recommendations powered by Claude Haiku, with a Needs Attention panel that flags deals requiring action.

GTM Lead Intelligence Agent (Next.js, TypeScript, PostgreSQL, Azure OpenAI)

- AI agent that discovers enterprise buying signals from Google News, PR Newswire, and Business Wire, then uses Azure OpenAI GPT-4o to confirm each article points to a real buyer and scores the lead as Very Hot, Hot, or Warm. Covers all five Concierto offerings across three regions, with duplicate detection, scheduled discovery runs, and daily digest emails. Users sign in with company accounts through NextAuth and Azure AD, and each user's data is kept separate.

RAG-Based AI Chatbot (Python, FAISS, Flan-Alpaca-Large, LangChain)

- Developed an AI chatbot using RAG with FAISS for retrieval and Flan-Alpaca-Large for response generation. Integrated LangChain for PDF processing and optimized embeddings for context-aware replies, with improved retrieval accuracy through efficient document chunking and similarity search tuning.

FR Portal: AWS ISV Fund Request Portal (React, NestJS, Prisma, PostgreSQL, Azure AD)

- Built a role-based fund request portal with Microsoft single sign-on, deployed on Azure App Service and Static Web Apps. Developed an Excel sync engine on Azure Functions that reconciled 119 funds totaling $8.8M, and automated status email notifications through Azure Communication Services.

Technical Skills

Languages: Python, Java, SQL
Frontend & Backend: React.js, Next.js, Node.js, NestJS, Express
AI & Data: Claude API, Azure OpenAI, LangChain, RAG, FAISS,openpyxl
Cloud & Identity: Microsoft Azure (App Service, Functions, Static Web Apps, PostgreSQL, Blob Storage, Communication Services), Microsoft Entra ID, Microsoft Graph API
Databases: PostgreSQL, Prisma, MySQL
Tools: Git, GitLab, Azure , VS Code, Postman

Certificates & Training

Cloud Computing Course, Trianz (Completed): Multi-Cloud Fundamentals, Cloud Service Models, Cloud Deployment Models, Core Cloud Services
Postman: API Fundamentals Student Expert
